

Front-End Web Developer – Joomla, Wordpress

Location: Denver CO – Downtown – In-Office

Web Developer is responsible for implementing a website design, layout, and site map via standard web languages and standard graphics applications where projects are moderately complex.

A successful candidate is able to follow project standards within established time-frames and at defined quality levels, and ensure projects are completed according to client specifications.

Essential Duties and Responsibilities

- Performs internal and client web site development in CMSs including Joomla and Wordpress; Magento experience is a plus.
- Experience in HTML, CSS, Javascript, and PHP programming in support of clients' website requirements.
- Identifies and leverages the appropriate technology opportunities for clients.
- Serves as local subject matter expert and technical consultant for web development projects.
- Assists in development, monitoring, and execution of web production schedule.
- Serves in a support role when needed by client.
- Ability to self-manage projects to meet client deadlines in a fast paced environment.
- This role will collaborate closely with the Content Marketing Manager on digital/content marketing strategy, development of email templates, landing pages, and analytics.
- This role will collaborate closely with the Art Director for graphics and design for websites.
- Keep up to date with the latest website trends and industry news.
- Develop new opportunities for revenue growth through digital channels.
- Actively participate in all team & department meetings to drive team success.
